1. Install the pocket in the desired location.

2. Install the side channel backs. The side channel back should abut the pocket, flush with the end plate. Screw the backside channel directly into the window jam.
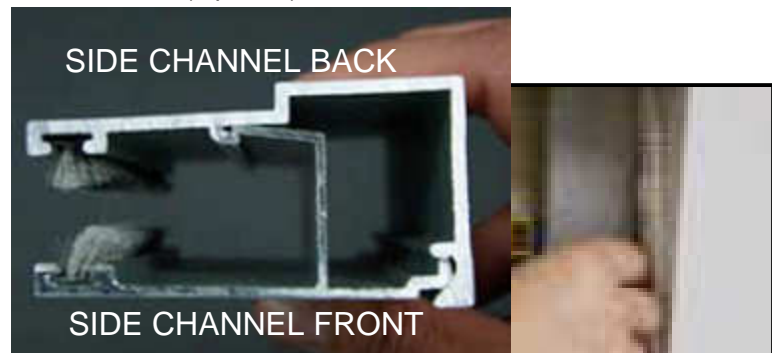

3. Install the shade
   into the pocket.

SIDE CHANNEL BACK

SIDE CHANNEL FRONT

4. Install the side channel fronts.
   With the shade in the up position,
   snap in the front of the side channel
   front to the side channel back.

5. Install the bottom channel within the side channels.

6. Install the Tension Devise.
Before attaching the tension device to the base, measure and mark the location in the window where the tension device will be mounted. Position the tension device on the window frame, or the wall, so that the device and chain control do not interfere with raising or lowering the shade. Make sure the chain loop is taut without over stretching.Holding the tension device upright, insert and secure the two screws. The mounting screws must be secured into a solid surface. Snap the Tension Devise into the base.
